27. Other comments regarding this course:

- -> maybe the headline of the course was misleading
-> too much statistical stuff, theory in course --> practise statistics at home why not a mixture of both in class?
-> +++ very motivated lecturer!
- Course was quite hard to follow. Maybe it would have been better if the content was a bit less and applied to more examples.
- Even though the subject matter was not very easily to follow in the beginning, this course was definitely one of the most useful courses I ever took.
- Thank you Roni... well, please see my online evaluation for my comment 
- Thank you very much for this course. I enjoyed it even though I don't like learning purely statistic methods. The thing I liked the most was that you were always able to find very good and understandable examples.
- The course was very advanced and I have not had a single other course that demanded as much regarding methodology. Nevertheless it's a methods course and I think we learned a lot and I would attend it again.
